CHICAGO, June 17.—The uplifting of the curtain of rain-charged clouds that have for about three resks overhung the Western American skies let in Boods of sunshine to-day that values of wheat withered. July closed with a loss of \$1463%c sere withered. July closed with a loss of \$\frac{3}{2}\square\text{c}\$ and September \$\frac{3}{2}\square\text{c}\text{c}\$. July had soid off from 75½c to 76½c. Everybody soid wheat and evinced no disposition to buy it back even on such a break as that shown above. There was nothing in their minds apparently but the coming of a great crop of new wheat here and in Europe, and the hastening of the advent of the home crop by the cessation of rain and the fair, warm weather that had generally succeeded it. The market refused to respond for more than a few minutes at a time and then only a small fraction and grew still weaker as the close of the session approached. Liverpool was 3½d lower in July and 1½d in September. The Paris market was heavy also and Antwerp extremely weak. The domestic receipts were small and Atlantic port clearances large, but such matters were ignored. The receipts at Chicago were 9 cars, against 11 a year ago, and at Minneapolis and Duluth 77 carloads, compared with 27 the corresponding day of last year, 207,000 bushels a year ago. Atlantic port exports of wheat and flour were equal to 700,000 bushels. Argentina shipped only 272,000 bushels this week. July opened it lower, at 726,78½c, sold down to 77½c, up to 78c, then dropped off to 75½c, then feel off to 54½g bid at the close.

The responsance of the sum in the Western country had a depressing influence on corn. It thawed out a good deal of long corn that holders had frozen to for some time and that lid dropped into the pit. July opened is lower, at 25½G25c, and sold off gradually to 31½g25c bid, the resting price. Western Kansas Too Wet for Once. OBERLIN, KAS., June 17.—The very wet weather is becoming as great a menace to the crops of Western Kansas as the hot winds have been in the past. Corn is getting very weedy, and the wheat is very near the danger line. The farmers fear rust in the wheat will materially damage it. All kinds of crops are growing very rapidly, and if the wet weather should cease long enough for harvest there will be an abundance of everything.

There is a steady demand for farm hands, and good wages are being offered. There are no idle men in this locality.

some extent a bearish factor. July opened %c lower, at 26 50%.

The decline in wheat and corn affected provisions an averably. There was a desultory commission house selling. July pork started 20c lower, at 25 50%, sold up to 25 50%, then declined to 25 50%, then declined to 25 50%, then declined to 25 50%, then the started 20c lower, at 26 50%, sold up to 26 50%, then declined to 25 50%, then declined to 25 50%, then the started 20c lower, at 26 50%, sold up to 26 50%, then declined to 25 50%, then the started 20c lower, at 26 50%, sold up to 26 50%, then declined to 25 50%, then declined were few and far between, and the only movement of prices was the sagging tendency almost inevitable in a lifeless market. Definite information as to the conditions of the coming crops is what speculators would most like to have. The markets were full of rumors to-day of damage and deterioration to the crops. The failure of the wheat crop to reflect any damage was attributed to large selling of the score mulations of the Letter deal. But, coupled with the reports of crop damage, it served to confuse the speculative mind and discourage operations. Money also showed a slowly hardening tendency, and starling exchange advanced on demand for remittance of dividends and interest due to foreign holders on July 1. The violent movement of several of the specialities reflected no general condition, and was without effect on the market beyond the stock immediately dealt in. Tobacco, the Rubber stocks, General Electric, Leather preferred and Lead all showed substantial advances, the dealings in Tobacco being on an enormous scale. Sugar fluctuated in a most eccentric manner all day over a range of 3½ points, part of the time above and part of the time below yesterday's closing price.

Railway bonds were very dull in sympathy with stocks, but prices were better held.

Dry Goods.

NEW YORK, June 17.—The dry goods market showed generally good results. There has been a widening of the demand for bleached cottons since the reductions of the carly part of the week and in some quarters stocks have been very materially reduced. Salesmen on the road are forcing business in the new dark fancy prints at the prices just made. The reductions in Washington clays seemed to point toward a lower level-on worsted goods. The new prices are said to be problibitive of English goods. There has been no general adjustment as yet. Staple cottons, aside from bleached goods, are unchanged. The export demand is only fair. Print cloths are quiet. There have been sales of 20,000 pleces odd goods, but no regulars, which are in slightly less active demand. Frints are active in all lines, which have been reduced, and in fail fancies.

"I have just got in from Elisworth, Russell, Rooks and Saline counties, Kas., and I never saw so much fine wheat," said John C. McCoy yesterday. "There is some little rust on the blades from excessive rains, but no damage is done yet. A little fair weather will complete a wonderful crop. I could see no wheat lodged. Harvest will commence the last week in June. Corn is poor and weedy and needs fair weather badly. I saw but few fat cattle, but there are a good many young cattle in farmers' hands."

The new sheep house on Nineteenth street south of the Live Stock exchange, adjoining the horse and mule market on the south, is fast drawing to completion and will be occupied Monday. The scales were being moved jyesterday from the sheep pens on the north side to the new quarters and are expected to be ready for work with the opening of next week.

The Polled-Angus won the day in the cat-The Polled-Angus won the day in the cattle market yesterday. C. H. Butler, of Frankfort, Kas., had in eighteen pure-bred Polled-Angus steers of his own raising and feeding that were besuties.

They were 2 years old passed, averaging 1,231 pounds, and were very smooth and beefy. They were sold by the Zeb F. Crider Live Stock Commission Company at \$5.00, the highest price for some time. They were on feed eight months, during which time they put on \$70 pounds. They were taken on an Eastern order.

Another lot of Polled Angus, grades, were brought in by C. S. Longren, of Riley county, Kas., that attracted some attention. They were of his own raising and feeding and a choice lot of export steers. They averaged 1,316 pounds and were s id by the Charles Dixon Live Stock Commission Company at \$4.90, next to the highest price of the day. They, too, went East.

price of the day. They, too, went East.

Dr. P. H. Mullowney, an assistant inspector of the bureau of animal industry stationed at San Antonio, Tex., writes Colonel Albert Dean: "After one of the severest drouths that Southwestern Texas has ever had, a perfect inundation of rain has visited this section and relieved the situation. The water question seems settled for another year at least. Though it rained west of here, in Val Verde county, it did not much alter the condition of affairs. The water runs off quickly, leaving the country about that place as dry as before."

Luther Fountain, who was married on Wednesday to Miss May Gambie. Mexico, Mo., returned yesterday with his bride and was given a joyful welcome by the horse-men on Grand avenue.

Hon. Matt Edmunds, of McLouth, Kas., brought in 60 nice steers that averaged 1,487 pounds, and were sold at 34.80. J. J. Gladdish, of Auliville, Mo., was at the yards yesterday with 5 nice pure bred yearlings and high grade Shorthorn bulls that are intended for the Western trade.
